PROFESSIONAL SUMMARY

Driven Full Stack Software Developer and Computer Science student currently pursuing a Diploma in Software Engineering alongside a Bachelor of Computer Science at Virtual University. Specializes in building scalable web and mobile applications using C#, .NET Core, Angular, React, and Flutter. Possesses proven experience in RESTful API development, query optimization, and Clean Architecture implementation to boost application performance and reliability.

SKILLS

C#, .NET Core, ASP.Net Web API, Entity Framework Core, RESTful APIs, Clean Architecture, CQRS, Dapper, Angular, Dart, Flutter, Python, Pandas, React, JavaScript, HTML, CSS, Bootstrap, SQL Server, MySQL, Git, GitHub, Azure, Power BI

WORK EXPERIENCE

DotNet Developer & Angular Intern

ThinkEDpak | April 2026 - Present

- Developed and integrated full-stack web application features using ASP.NET Core, C#, Angular, RESTful APIs, and SQL Server.
- Implemented backend business logic, CRUD operations, API integration, and database connectivity for structured web applications. Applied Clean Architecture principles to improve separation of concerns, maintainability, and scalability.

Teaching Assistant

Aptech Learning | December 2025 - April 2026

- Delivered technical instruction for short-course batches covering HTML, CSS, JavaScript, and programming fundamentals.
- Provided hands-on guidance with coding exercises, debugging, web development concepts, and programming fundamentals.

Dot Net Developer (Trainee)

Wenawa | July 2025 - September 2025

- Completed a 2-month hands-on .NET and C# training program focused on backend development and structured application logic.
- Built CRUD functionality and relational database schemas using ADO.NET and Entity Framework Core.
- Practiced database connectivity, backend development, debugging, and application development using .NET technologies.

EDUCATION

Bachelor of Computer Science

Virtual University Of Pakistan | Feb 2024 - Present

Diploma in Software Engineering

Aptech Learning | Aug 2023 - Present

PROJECTS

E-Commerce Bookstore Portal | ASP.NET Core, Angular, SQL Server, Clean Architecture

- Designed a 3-tier layered web application utilizing ASP.NET Core Web APIs and Angular.
- Implemented dynamic Role-Based Access Control (RBAC) to enforce secure authentication, granular permission handling, and catalog management.

EventSphere Management | MERN Stack (MongoDB, Express.js, React, Node.js)

- Architected a full-stack expo management platform featuring dynamic role-based access control (RBAC) for Admin, Attendee, and Exhibitor roles.
- Engineered secure RESTful APIs with Express.js and Node.js to manage event schedules, booth registrations, and attendee ticket allocations.
- Built responsive, interactive user dashboards in React, streamlining exhibition workflows and real-time coordination between event organizers and participants.
